Global Life Expectancy

Avg. Life Expectancy around the world is 70.2 years.
Click on the map to look at other countries.

Life Expectancy is globally increasing. We get older and older each year.

Years	life expectancy ...	life expectancy ...
1. Japan	[bar]	84.23
2. Switzerland	[bar]	83.43
3. Singapore	[bar]	83.24
4. Republic of Korea	[bar]	83.24
5. Spain	[bar]	83.19

To have a long life
you want to live in :

What is the secret sauce? Is it Sushi or Chocolate?

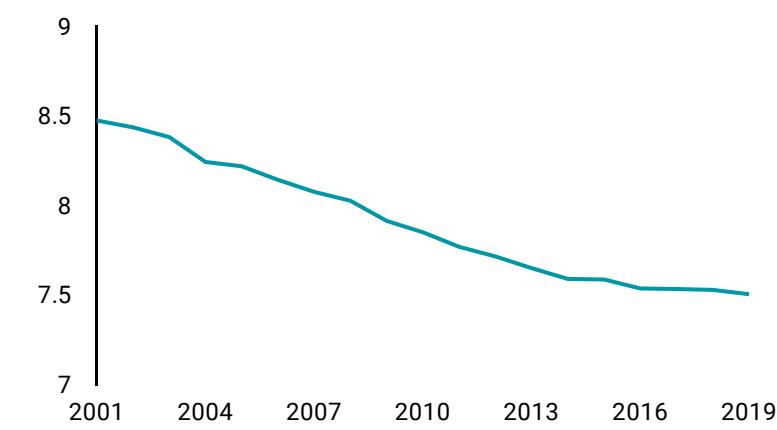

Years	life expectancy ...	life expectancy ...
1. Lesotho	[bar]	49.03
2. Central African Rep...	[bar]	49.52
3. Eswatini	[bar]	52.49
4. Somalia	[bar]	53.68
5. Haiti	[bar]	54.62

These people are not so well off. The average life expectancy is 50 years for them.

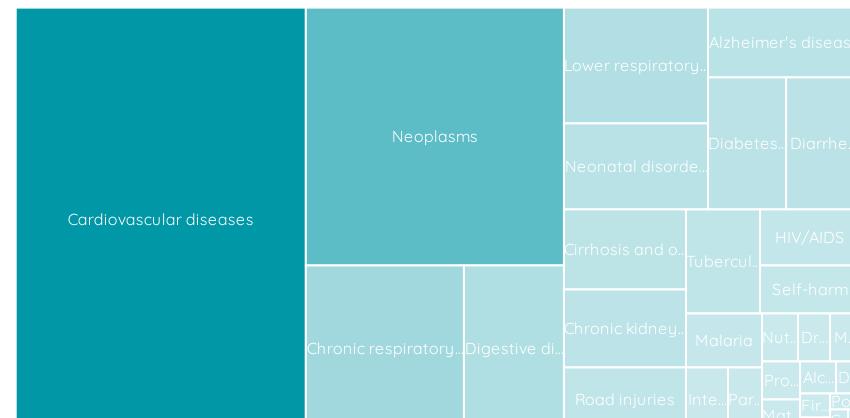

Causes of Death

Death rate. crude (per 1,000 people)

The Crude Death Rate is the rate at which people die in a population over a given period. No data was available from 2000 to 2021. Overall, the people death rate is decreasing per 1,000 people.

Life expectancy by Bucket

34% of the world's people died of **cardiovascular diseases** in 2019, 19% of Neoplasms, 7% of Chronic respiratory diseases, and 4% of digestive diseases.

Let's try to understand where countries with **low life expectancies** are dying from. Selecting the Dropdown bucket with less than 60 years of life expectancy, you can see that 13% of people in this category die from **neonatal disorders**, about 12% from **diarrelial diseases**, 12% from **cardiovascular diseases**, and 11% from lower respiratory infections.
